

FT090 - FLEXURAL FRAME

A simple and practical frame developed for testing on standard concrete beams. The distance of both pair of loading and support rollers can be easily adjusted: one of the two upper rollers can be removed and the other placed in the center to center point loading test.

FT090 - FLEXURAL FRAME

ORDERING CODE

FT090

- 100 kN cap. flexure frame complete with rollers,
- For Centre and two point loading on concrete prisms 100x100x400/500mm and 150x150x600/700mm
 - Rigid two-column welded frame
 - Piston travel 75 mm, piston return by counter-weights
 - Max. Vertical clearance 165 mm
 - Horizontal clearance 180 mm
 - Distance between upper rollers: adjustable to 100 mm, 133.3 mm, 150mm, 200mm for two point loading or single roller for center point loading
 - Distance between lower rollers 400 and 600 mm

SPECIFICATION

For sample dimensions	100 x 100 x 500
	150 x 150 x 700
Vertical daylight (mm)	165
Horizontal daylight (mm)	500
Ram Travel (mm)	75
Pressure transducer bar	350
Distance piece	63 dia x 45 mm
Weight (kg)	220 approx
